Powdersafe
Contaminated Mail Isolation System

PERSONAL PROTECTIVE EQUIPMENT (PPE)

To support risk management strategies and to protect your health and safety in the mailroom/workplace, Powdersafe has developed a PPE kit that contains the following items:

- One pair of safety glasses
- One face mask rated N95
- One waterproof gown
- One pair of anti-skid shoe covers
- Two pairs of non-latex (low allergenic) gloves – medium and large

Powdersafe recommends that the kit be worn while an incident is being managed, for example when suspect mail has been discovered.

Kits are not designed for extended wear and should be properly disposed of after an incident at the guidance of the emergency services where applicable.

Kits can be purchased as a single unit for \$55 (incl GST) or as a box of 15 for \$750 (incl GST). Freight and insurance extra.

Instructions for use are provided with the kits.
