Auto+ Shredder

Let the Auto+ save you time!

The Auto+ is a new ultra-efficient, auto-feed bulk shredder, with the ability to automatically shred up to 500 A4 sheets in one load. There is no need to remove staples or paper clips beforehand, thus saving you precious time. Simply load the paper, close and lock the lid and the Auto+ will do the rest.

The Auto+ is designed for use in facilities with multiple users, with regular bulk shredding. Documents of high importance or security are safely destroyed and locked away via password during the shredding process.

- Automatic shredding for minimal human intervention
- Innovative roller based autofeed technology that accepts paper fastened together with staples or paper clips, which saves the time-wasting hassle of having to remove the staples first
- Confetti cut (2 x 20mm) DIN 3 for high security
- 500 sheets capacity for bulk shredding
- 83 litre bin can hold up to 1000 sheets
- On the odd occasion you only need to shred a few sheets, up to 6 sheets can be fed through the centre of the shredder head
- Ultra quiet operation – Noise level is less than 60DBA
- Auto reverse functionality to clear paper jams (when bulk shredding)
- Easy to understand state of the art LCD Display (User instructions include: ready, door open, bin full, reverse, overheat, overload/jam, oil now)
- Casters fitted for ease of manoeuvring
- Security password locks sensitive information in the shredder while shredding is taking place so you can go elsewhere with total peace of mind
- Meets new international finger safety standards (UL 60950)
- Separate key provided to unlock the shredder if the security password has been forgotten
- Continuous Operation – shred in bulk without worrying about allowing the shredder to cool down!
- Can shred up to 20,000 sheets per day
- Dimensions (mm) 915(h) x 430mm(w) x 545(d)
