

AS-SERIES

ADDRESSING SOLUTIONS

Making your mail work harder for your business.

- Speed range from 7,000 to 39,000 env./h.
- Various thickness handling from letters to catalogues, up to 10 mm
- Both shuttle and fixed heads technologies available
- Heavy duty built-in features for high volume printing
- Conveyor/stacker options available for the entire printer range

MAIL MANAGEMENT SOFTWARE & POSTAL DISCOUNTS

AS-Series software helps you make the most of your printer's speed and output capabilities. It is fully compatible with the majority of databases on the market and allows you to efficiently handle your database, deleting duplicates and inaccurate addresses. Talk to us about Address Barcoding software so you can benefit from the best discounts.

BUSINESS CONTINUITY WITH BUILT-IN RELIABILITY

Neopost technology comes with all the reassurance of proven reliability and endurance. Ease-of-use comes as standard, with settings, features and performance updates easily downloaded directly to the printers via a PC.

And help is always at hand from our client service teams who are ready to answer any of your queries.

AS-SERIES

HIGHLY EFFICIENT ENVELOPE PRINTING SOLUTIONS

When you invest in a mailing to clients and prospects, you want it to have the best possible impact and the highest chance of a response. That's why accuracy and image are critically important.

The Neopost AS-Series offers outstanding quality across its extensive range of printing solutions designed for office mailrooms as well as larger mailhouses. These innovative, flexible printers produce elegantly and accurately printed envelopes which have a higher chance of being opened by the recipient.

With high speeds and capacity, professional, personalised mail is processed faster and reaches your customer sooner. Costs are reduced with higher efficiency, better Postal Service savings and greater in-house control of your mail output.

SHUTTLE HEAD OR FIXED HEADS?

Shuttle head is the most versatile in terms of print area. You can cover the full page and print nearly any data on the envelope or the document: address, logo, barcode, graphics... Designed to find its place in an office environment, shuttle head is the ideal choice for a letter personalisation and graphic-intensive applications.

More production-oriented and designed for high usage, fixed heads printers are able to print at constant speed whatever the content is and to print on thicker documents such as magazines or newsletters. Ideal in a production environment, fixed heads technology is highly recommended for high volume printing or repetitive mail runs. Secured paper path and low jam rates ensure better output, for a better business processing.

ADD MARKETING MESSAGES TO YOUR ENVELOPES

INCREASE RESPONSERATES

ENHANCE OPERATIONAL EFFICIENCY WITH HIGH OUTPUT AND TOTAL FLEXIBILITY

CUT POSTAL COSTS

INTEGRATE INTO YOUR COMPLETE MAILROOM SOLUTION

A BETTER RESPONSE RATE

An eye-catching, accurate mailing is far more likely to be opened than one that looks dull and is badly addressed or sent in duplicate. The AS-Series gives you all the tools you need to take the blank space of a standard envelope, and turn it into a medium for your message. You can maximise its potential, personalising your message and targeting your audience effectively. Then you can change your message as often as you want to keep things fresh. And you can do it all in-house, quickly, economically and efficiently. The very latest Hewlett Packard technology ensures an absolutely professional image, every time.

TIME-SAVING FLEXIBILITY

Whether for marketing activities or the monthly invoice run, you want your mail to get to your customers in the shortest possible time, with no mistakes. The AS-Series ensures maximum speed, accuracy and flexibility for all your printing jobs. Got an unexpected customer offer you need to integrate? No problem – the AS-Series gives you the flexibility to make last-minute changes with ease. Productivity is increased naturally, with high printing speeds and high capacity outputs which reduce cycle time. And your customer information is protected with the in-house control of the database.

ENHANCED COST CONTROL

Printing labels is an expensive and time-consuming business. The AS-Series cuts out the need for buying and stocking labels – and the manpower required to apply them. Simple, blank envelopes are transformed into powerful marketing messages that work hard for your business. The duplicate and inaccurate addressing detection feature allows you to reduce return, duplication and unnecessary mail costs. And because you can produce a higher volume of mail faster, you can benefit from Postal Services volume discounts. In fact, an AS-Series solution installed in an average business mailroom will pay for itself in just 4 mailings!

MAILROOM INTEGRATION MADE EASY

The AS-Series is extremely easy to install without major IT involvement. Just load the "Plug'n'Play" software onto your computer and within a few minutes you're up and running. One-touch controls and clear, concise prompts on the LCD display make even the most complex jobs seem easy. Our addressing solutions come with a variety of finishing options to suit your needs. For optimum efficiency with larger mail runs, you can add an optional stacker or additional drop tray. They integrate easily into your existing mailing process with folder/insertor, mailing machine and more.
