

GBC Total Service Solutions

Securing your investment.
Providing peace of mind.
Helping when you need it most.

Technical Service Solutions

Onsite warranty repairs.
All machines supplied by GBC Australia are protected by a 12 month on site warranty (within 100km of the nearest GBC Australia Service Centre).

Onsite after warranty repairs & service

We provide onsite technical service to almost anywhere in Australia. Our mobile technicians are fully trained and carry genuine GBC parts. GBC Service Technicians are equipped with the latest in service automation systems (Mobileware©) for receiving service calls, ordering of spare parts and accessing technical information. This means faster response, prompt repairs and less downtime for your equipment.

❖ **IJ25** | Postage Meter

IJ-25 is a revolution in cost effective convenience for up-and-coming businesses.

The IJ-25 is the most compact Neopost postage meter. It is aimed at small businesses and small offices. With the IJ25's connected scale (weighing articles up to 2kgs) and automatic postage calculation, you can always be sure to meter your letters and parcels with the exact postage amount.

❖ **IJ35R** | Postage Meter

The IJ-35R is a fully refurbished system with all the features of a new machine.

A desktop machine with mailroom speed and capability? It's simply a matter of Neopost. The IJ-35R is compact and easy to use, yet it has many features of much larger machines to handle all your mailing needs.

❖ **IJ40** | Postage Meter

The IJ-40 is compact & complete. Fully integrated mail pricing, on-line postage rate updates.

A desktop meter with mailroom speed and capability, can it get any better than Neopost?

- * Online updates of new postage rates
- * Fully integrated 2kg weighing platform
- * Optional automatic letter feeder
- * Re-credit from your desk in two easy steps

❖ **IJ50** | Postage Meter

Economy meets productivity. IJ50 has features seen on higher volume systems.

IJ50 is a versatile, compact inkjet mailing system for businesses with growing mailing needs. This solution combines speed, ease of use and quiet operation to make an instant productivity improvement in any busy office.

❖ **IJ80** | Postage Meter

Increase mail center output and keep costs in check

- * Process mail at speeds up to 185 letters per minute
- * Track postage and costs for up to 200 departments
- * PC interface for exporting data and reports
- * Differential weighing option automatically calculates postage
- * Process mail up to 16mm thick
- * Expand your mailing capabilities with peripherals, such as the IJ Dynamic Scale, as your needs grow

❖ **IJ90** | Postage Meter

IJ90 digital mailing system - the perfect combination of speed and simplicity

More than just one of the fastest, most elegantly designed mailing solutions - Neopost's IJ-90 mailing system delivers advanced, time saving technology to make your mail center more efficient and effective. The IJ-90 raises productivity to new heights with maximum performance and intelligent functionality that's simple and easy to use.

❖ **IJ110** | Postage Meter

Powerful mailing performance and modular efficiency

No other mailing system can match the performance standards set by the Neopost IJ-110. The IJ-110 is the fastest, most fully featured mailing solution on the market, combining the highest performance and intelligent technology to increase mail center productivity. Now you can get it all done - on time and with ease.

❖ **PIP** | Pricing In Proportion

Who can promise to have you ready for PIP?

Neopost / GBC Australia have changed the way preparation of mail and postal costs are calculated with the introduction of a new system called Pricing in Proportion. Don't let your business get pipped by these changes - you need to ensure that you control cost in your mail processing and postage. What action do you need to take not to get pipped by PiP? Get a Neopost consultant to review your mail process.

❖ **I-Weigh** | Dynamic Scale

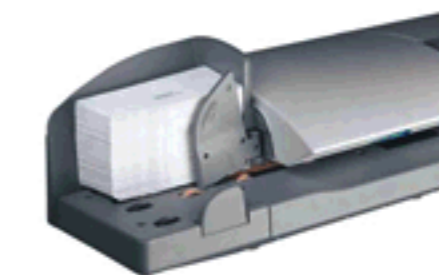

Checks weight while in motion to calculate the correct postal rate.

The Neopost i-Weigh™ makes mail processing simple and accurate for every business, whether your volumes are 100 or 1,000 a day. Checks weight while in motion to calculate the correct postal rate. Just drop in the mixed weight envelopes and press 'start'. Runs at up to 7,500 per hour - one of the fastest of its kind in the market.

❖ **Mixed Mail Feeder**

Our new Mixed Mail Feeder tackles normal and thick mail with no adjustments to make!

Compatible with the high speed I-Weigh dynamic scale and IJ80/90/110 postage meter, our new Mixed Mail Feeder tackles normal and thick mail with no adjustments to make! Handles pre-sealed and un-sealed envelopes simultaneously, plus offering huge stacking capacity.

❖ **HF200** | Compact Paper Folder

Designed to suit the smaller office, the HF-200 folds up to 140 pages per minute.

Simply a breeze to operate, flexible, quiet and compact. The HF200 is for the smaller operation that has monthly newsletters/statements or weekly invoices to fold. Virtually maintenance free patented roller cartridge system.

❖ **Duplo DF915** | Automatic Folder

Precision folding up to A3 sheets with six inbuilt standard folds at the press on a button.

Precision folding up to A3 sheets. Ultra compact design, paper loading and unloading is located at the same side of the machine. The DF-915 has six inbuilt standard folds at the press of a button. Additional two special custom folds can be retained in memory.

❖ **SI30** | Folder Inserter

Did you know it costs about 10 cents to fill an envelope by hand?

Mailings by the hundred... the ideal Folder Inserter for any office. Many companies continue to process hundreds of business and promotional letters manually every month. This activity is not only time consuming but affects staff motivation and considerably delays response times to your business mail.

❖ **DS62** | Folder Inserter

As easy as a photocopier, the DS-62 Folder/Inserter saves you time and money!

That end of the month rush to get the cheques and invoices out? It's easy with DS-62 - just a simple, automated process. Have busy days when the letters aren't signed yet and you need to get home?? The DS-62 will do the daily mail in a fraction of the time.

❖ **DS70** | Folder Inserter

The easy-to-use Folder Inserter for larger office mail runs.

The DS-70 is designed for businesses which have variable types of documents and regular peaks of mail volume. Volume capacity of 40,000 pieces per month and a maximum speed of 3,500 env/hour.

❖ **DS80** | Advanced Folder Inserter

High productivity Folder Inserter.

The DS-80 is just right for your business. Whatever application your business comes across, the DS-80 handles them all. All your applications can be handled, from invoices to mail shots, even including those with the addresses at the bottom.

❖ **DS86** | Folder Inserter

High volume, small footprint system.

Don't miss business opportunities because of your Folder Inserter. With DS-86, Neopost facilitates productivity, flexibility and ease of use at the highest level. Opportunities are unlimited, as it performs your daily administrative jobs and excels in direct marketing applications. Moreover, with many upgrade capabilities, your future needs are also secured.

❖ **DS100** | Folder Inserter

A compact, ergonomic design, the DS-100 delivers optimum practical speed.

The Neopost DS-100 enables you to easily create professional, top-quality mail pieces. The system easily adapts to accommodate a wide range of envelope sizes and address locations (such as top, middle and bottom).

❖ **DS140** | Folder Inserter

A compact, ergonomic design that allows for greater operator efficiency and ease of use.

The Neopost DS-140 enables you to easily create professional, top-quality mail pieces; with a superior document packet thickness of 6mm, the DS-140 allows you to process a wide variety of mail items for - direct-marketing campaigns, invoicing, monthly statements and virtually all of your company's mailing needs.

❖ **DS1000** | Folder Inserter

High performance mail system for heavy use.

The DS-1000 offers total flexibility in mail processing from a few hundred letters per day right up to high monthly volumes. Almost any system configuration is available from a simple two-station machine to a highly sophisticated 16 station installation using all Neopost's technical experience... and at a fraction of the cost of other Production Folder/Inserters.

❖ **DMI4000** | Inserter

Versatile and easy to use - simply the most flexible DL to B4 Inserting System available.

A cost effective modular direct mail inserting system capable of processing envelopes from DL to B4 and packs up to 12mm in thickness. No mailing job is too big or small with fast setup and quick turnaround a key feature of this system.

❖ **MMPC** | Mail Piece Production Control

Assurance that jobs are accurate and complete.

Are you sure that your printed jobs are actually being mailed? Due to the fact your business depends on a secure mail process, Neopost has developed the perfect solution. Mail Piece Production Control builds an audit trail for each production job. This provides you with real-time quality control and detailed line-item reports.

❖ **AS700** | Shuttle Head

The versatile address, barcode & graphics printing solution.

The AS-700 will make your mailings look more professional by giving you the ability to print addresses, logos, barcodes and graphics almost anywhere on the mailpiece.

❖ **AS710** | Shuttle Head

AS710 offers high print quality & speed - enabling you to process daily mail quickly.

Make a huge impact with your mail and increase your response rate with the AS-710 Addressing System. Make your mailings look more professional while decreasing turnaround time with its high speeds.

❖ **AS830** | Fixed Head

AS830 three fixed head address printer.

The AS-830 Addressing System from Neopost ensures maximum speed, accuracy, and flexibility for all of your address printing needs. Systems feature fixed head technology capable of printing at nearly constant speed regardless of content.

❖ **AS960HD** | Heavy Duty

AS960 Heavy Duty 6 head address printer.

Project a professional appearance with all of your mailings. The AS-960 Addressing System prints 600x600 dots per inch using patented HP printing technology, giving you sharp, crisp, more easily readable addresses.

❖ **MAS** | Mail Accounting Software

Direct access to all your data, anytime, anywhere.

Neopost's MAS (Mail Accounting Software) is designed for businesses with more sophisticated needs than those provided by a standard postage meter. MAS will collect, maintain and report on mail accounting data, helping you track and better control your business mail expenses.

❖ **PrintMachine** | Software

Gain total control over your company's mailings.

The PrintMachine family of software from Neopost is the smart way to automate your document output management process. It manages your entire outbound document flow from creation to distribution. Also, PrintMachine software optimizes each mailing to give you the lowest postal rate possible.

❖ **AVM Express** | Address Validation

AVM Express brings you powerful tools previously only available from expensive systems.

AVM Express is a flexible and simple-to-use solution that takes maximum advantage of new barcode sorting and delivery technology introduced by Australian Post.

❖ **FlexMail** | Address Print Management

Add Flexmail to your address printing solution.

FlexMail lets you connect to your data, design any mailpiece, merge/purge and de-duplicate files, make changes to a mailing list, clean and validate the addresses and sort mailings to meet postal requirements.

❖ **SESAM 1** | Letter Opener

Opens 300 envelopes per minute.

The Neopost SESAM 1 Letter Opener eliminates the problem of damaged documents by employing an alternative method to opening envelopes that actually protects the contents. By slitting only the top layer on one side of the envelope, the contents are undamaged and there are no paper scraps left to clean up.

❖ **OPEX 206** | Letter Opener

High-speed mail automation equipment.

Equipped with Opex's unique high-speed milling cutter technology, the Model 206 offers durable performance for small mail-opening operations. Opex's unique milling cutter produces a soft, feathered edge, providing content security. For automated mail processing needs, the Model 206 is ideal for mixed sizes of mail including large letters as well as oversized and thicker than normal envelopes.

❖ **DS1225** | Mixed Mail Scanner

For mixed document capture.

Despite the demanding pace of business, many scanning operations are forced to prep away their productivity. Preparing a variety of documents for scanning creates delays and increased labor expenses. The OPEX DS1225m was designed to scan even the most challenging documents with little or no preparation.

❖ **OPEX 2100** | Letter Opener

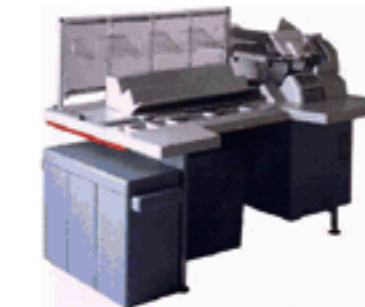

For medium-sized mail processing operations.

The Model 2100 offers proven technology for both offices and small mail-opening centres. This tabletop unit provides mailroom automation for low volumes of incoming mail, and it is equipped with the same milling cutter technology as the higher speed Model 206 Envelope Opener.

❖ **LO51** | Rapid Extraction Desk

Mail extraction, a process change!

OPEX Model 51 Rapid Extraction Desk offers speed, efficiency and automatic adjustments to handle a variety of intermixed mail. The advanced design of the Model 51 provides high-precision control for semi-automatic mail extraction, including fine adjustment settings for accurate cutting. Advanced ergonomic features include workstation hydraulics to adjust the work surface height, convenient desktop, customized sort configurations and easy accessibility.

❖ **AS3690i** | Mail Extract & Scan

The AS3690i can scan mail as soon as it is opened - in a single pass.

The OPEX AS3690i™ is a high-speed colour scanner with a unique drop feeder integrated into an OPEX Rapid Extraction Desk. By combining mail extraction with image capture it is no longer necessary to route paper outside of the mailroom to be processed. In just one step the AS3690i operator can open, extract, identify, scan, orient, sort, print an audit trail and output mail contents.
